

Year 6 Science Knowledge Organiser- The Circulatory system

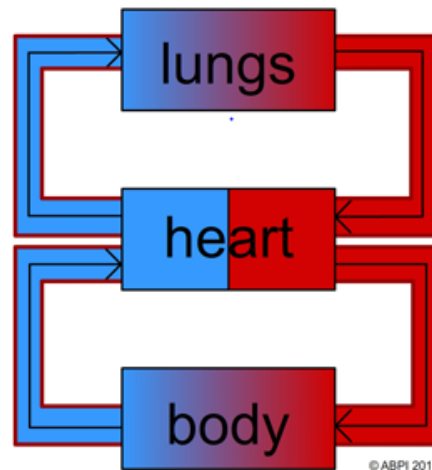

The Function of the Heart:

- 1 **Deoxygenated** blood flows into the heart from the body through the veins
- 2 This blood is pumped out to the lungs through the **pulmonary artery**
- 3 Blood is then **oxygenated** in the lungs
- 4 Blood returns to the heart through the **pulmonary vein**
- 5 The oxygenated blood is then pumped out of the heart through the **aorta**
- 6 The blood travels around the body delivering oxygen and nutrients to the organs.

The Circulatory system

The system that circulates blood around the body.

Science Vocabulary Dozen

Heart	A strong muscle in the chest protected by the ribs, that pumps blood around the body
Capillaries	Microscopic blood vessels found in the muscles and lungs
Blood Vessels	The tubes that carry blood around the body
Artery (Arteries)	The vessels that take blood away from the heart
Veins	The blood vessels that carry blood back to the heart
Oxygenated blood	Blood that is rich in oxygen
De-oxygenated blood	Blood that contains very little oxygen
Blood	Liquid that travels to every cell in the body transporting nutrients and oxygen. Contains red, white blood cells, plasma and platelets
Atrium (Atria)	The upper chambers of the heart (Right and left atrium)
Ventricles	The lower chambers of the heart (Right and left ventricles)
Valve	A one-way 'door' that allows blood to flow freely in one direction, not allowing blood to flow back through the valve.
Pulmonary	Related to the lungs and breathing

Components of blood

Plasma

Transports nutrients, hormones, and proteins. It is a yellow liquid that makes up about 55% of the body's blood volume.

Platelets

Form clots to stop bleeding. Platelets make up less than 1% of blood.

Red blood cells

Carry fresh oxygen through the body and remove carbon dioxide. Red blood cells make up about 40 to 45% of blood.

White blood cells

Part of the body's immune system, detect and fight viruses and bacteria. There are five major types of white blood cells, and they make up less than 1% of blood.
